UWL Financial Technology Graduate Certificate Program: Readmission after dismissal policy

Scope: This policy expands on the Graduate Catalog readmission after dismissal policy.

Upon receiving a student's request for readmission, as specified in the Graduate Catalog readmission policy, the UWL Financial Technology Graduate Certificate Program Academic Director (AD) will review the request. A determination on the request will be made within seven calendar days of receipt.

If the AD approves the request for readmission, the request is approved. If the AD does not approve the request for readmission, the AD will form a review committee consisting of either two UWL Graduate Program Directors, or one UWL Graduate Program Director and one faculty member from the UWL Department of Computer Science & Computer Engineering. The review committee will examine the readmission request and the student's academic record. The committee will then vote on a motion to approve the readmission request. If the motion passes, the request is approved, otherwise the request is not approved.
