Dr. Joe Gow, Chancellor University of Wisconsin – La Crosse  
University of Wisconsin – La Crosse  
135 Graff Main Hall  
La Crosse, WI 54601

Dear Chancellor Gow,

At Trane Technologies, we're taking bold action for a more sustainable future. We make a difference here – from the innovative climate solutions we produce to our passionate people who uplift our community each day. The vital work we do at Trane Technologies in La Crosse is creating a better tomorrow for our people, our community and our world.

As we continue to challenge what's possible, our company must find ways to accelerate student interest and success STEM career fields. We see a direct relationship to the academic work and expansion of these curriculums at the University of Wisconsin – La Crosse.

On behalf of the Trane Technologies La Crosse team, we proudly support the proposal for the University of Wisconsin – La Crosse Prairie Springs Science Center expansion. We have a significant number of University of Wisconsin – La Crosse alumni, including myself, many with STEM degrees that play critical roles in our organization today. As a company and an industry, we need more graduates in STEM-related fields to help achieve our bold sustainability goals and to fill critical STEM workforce needs of the future.

We look forward to working with the University of Wisconsin – La Crosse to help provide experiences and training for Science Center students, paving the way for successful careers at Trane Technologies and other essential employers. Trane's working professionals in the greater La Crosse area will continue to be resources and mentors for students, in addition to our ongoing support with University of Wisconsin – La Crosse career fairs, campus speaking engagements, internships and job opportunities.

In closing, we are proud to support this initiative to help develop the next generation of climate innovators in Wisconsin, positively impacting our community for decades to come.

Sincerely,

Randal Newton  
Vice President, Engineering, Trane Technologies

On behalf of Trane Technologies La Crosse-area leaders
